MACMARTIN'S NUT CRACKER

The MACMARTIN'S nut cracker is a heavy duty, robust, cost effective Macadamia nut cracker with low maintenance cost abilities, specifically designed for the harsh African environment.

This machine cracks the nuts through a roller system and has no costly blades to replace.

SPECIFICATIONS

The Nut Cracker is manufactured from heavy duty mild steel and powder coated to "carrier beige"

All chutes and feeder pans are made of 2mm ring polished stainless steel (304)

All moving parts and vibrator feeder are fully enclosed within a ring polished stainless steel enclosure.

The nuts are fed into the rollers by means of a sizer, sizing between 14 - 32mm

The sizer and vibrator pan are fully adjustable by means of variable speed drives

The cracker is capable of +/- 1.5 tons per hour, depending on variety.

For enquiries and quotations contact: Antonn: 083 628 6125 Tel: 015 297 1617 Fax: 015 297 0630
